Swimming Pool Displays

LED Screens for Pool Areas

LED screens can typically display instantly updateable information and the obvious example in this instance would be a clock timer for a sporting event such as a swimming gala and instant race results keeping the spectators fully up to date on the events of the day.

A wide range of information can be displayed such as; a timer for timed races with competitors race positions, the current leaderboard with positions and times, scores if it's a water based game, as well as general information, competitor profiles and sponsors adverts and our video display screens can show live action or video replays.

The full colour LED screens can be integrated with many Swim Meet software packages such as Meet Manager 6.0 from Hy-Tek Ltd, used for International Meets such as World Cup and Pan Pacific Championships and all levels of Swim Meets with standard or advanced options.

The choice is really up to you as to what sort of display you go for, anything from a simple scoreboard and timer up to high definition video displays and all in between! Our screens are full colour with a large range of LED pitch sizes giving you standard definition through to ultra high definition dependant upon the viewing distance and, of course, your budget.
